◆ **CCE (Continuous and Comprehensive Evaluation)**

The Continuous and Comprehensive Evaluation (CCE) refers to a mode of evaluation and assessment of students at the school level and the scheme is spread over the entire period of an academic session. The basic objective of this scheme is to make teaching and learning a learner-centred activity that enables to develop child's individual skills, interests, attitudes and motivations at the higher levels.

The features of this system include regularity in assessment, frequency in conducting class/unit tests and arranging re-tests if needed, application of corrective measures and collection of feedbacks from teachers and students. It pertains to a 'process of learning and applying what has been learned, and assessment of what has been learned.'

In view of the Teacher's Manual on Continuous and Comprehensive Evaluation, issued by the educational authorities concerned, the PCM Scheme of Studies has incorporated this evaluation scheme in the Scheme of Studies as Activity, Seminar, Collection, Preparing wallchart, Preparing diary etc. as specimens. The teachers may introduce any type of assignment, for the students under the CCE.
